

Type K Surface Thermocouple Probe

Model: HP-404A-T21

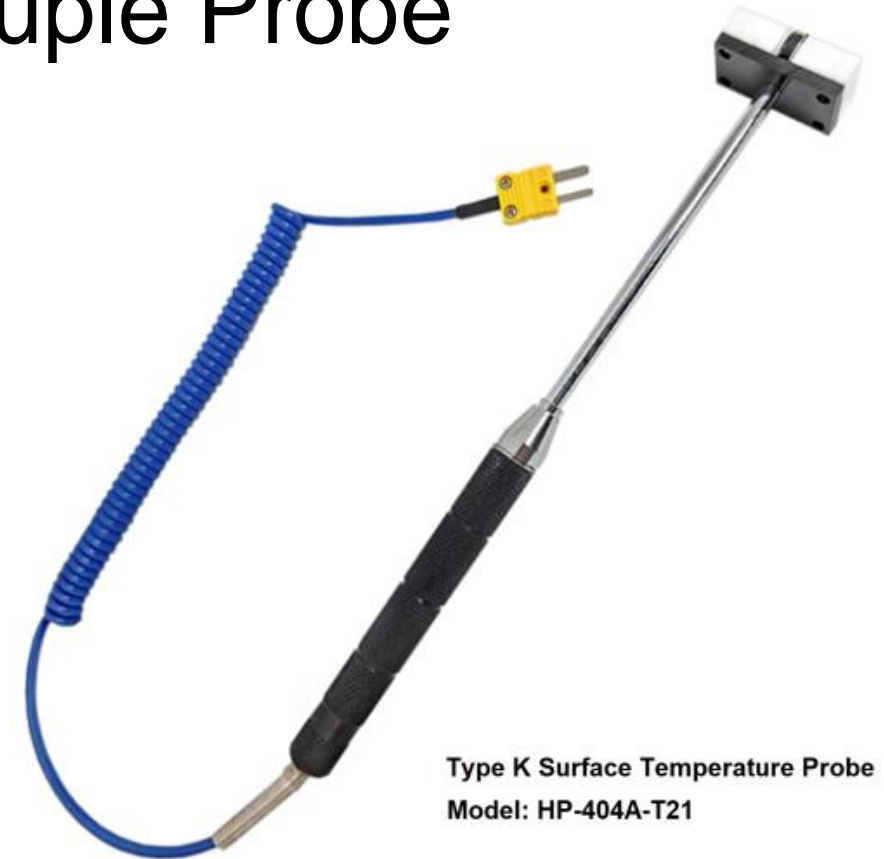

SPECIFICATIONS	
Sensor head size	40 mm (L) x 23 mm (W) x 13 mm (H)
Max. temperature	200 °C
Response time	3 sec.
Ribbon element	Triple (default) / single (wear resistance)
Cable length and material	PU coiled cable in blue: 2M (default) or straight cable length: requested by customers

FEATURES

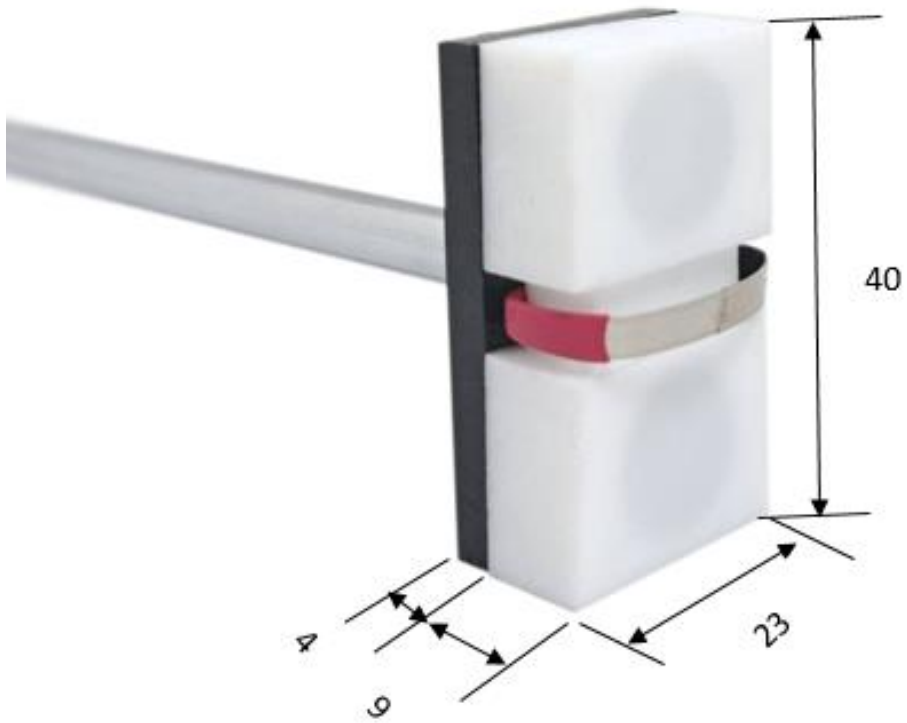

- Straight surface probe
- Triple ribbon or single ribbon element selectable
- Miniature connector / spade lugs / bare wire selectable
- Fast response time
- Good insulation effect
- Compatible with Type K thermometers

APPLICATIONS:

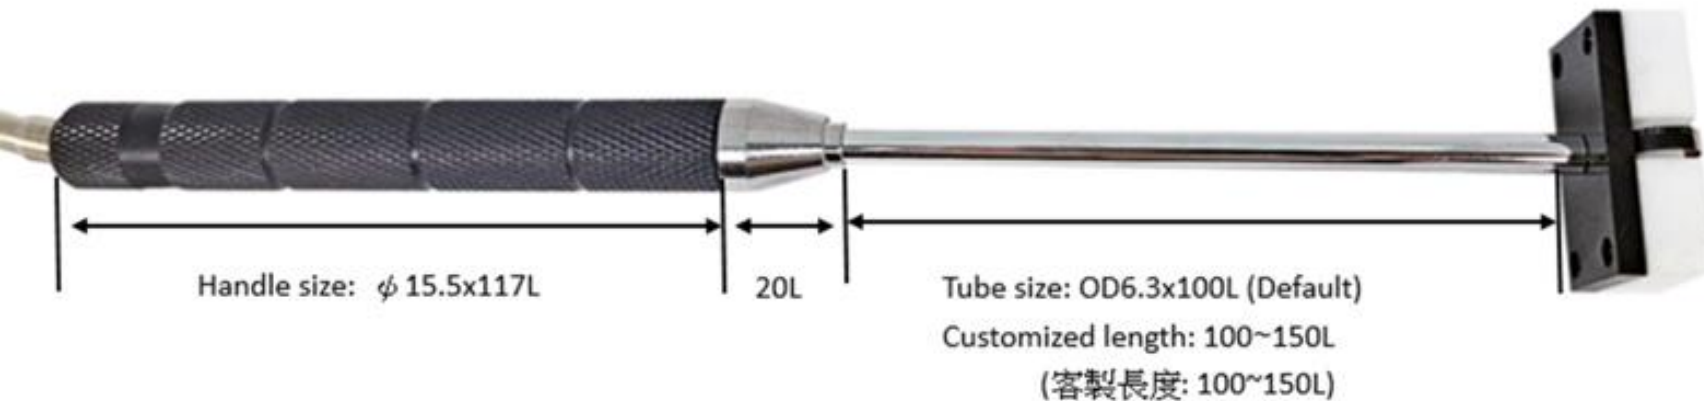

Surface temperature probe is ideal for measuring stationary surface such as molds, textiles, packages, prints, pc boards, papers, and electronic elements

Type K Surface Temperature Probe
Model: HP-404A-T21

K、J、E、T Type digital thermometer
Model: TFC-307A

Unit: mm
